Dear Eric,

I wanted to write to you to express my deep felt thanks for the quality job Worship Interiors Group did in restoring our chapel pews. We were on the verge of throwing them away because they were so worn out from decades of use. A few years ago, we had hired someone else to restore them. Their work was so poor that after they did one pew, we cancelled the job and began looking to buy chairs. We're so thankful we came across your company and now have a renewed worship space that is bright and beautiful. The transformation is astounding!

Not only is the quality of your work to be praised, but your customer service as well. I really appreciated the way you explained the many options and helped me (someone who knows little about fabric or woodworking) navigate the process. I also greatly appreciated the way that you were gracious to me as our end of the project took longer than expected.

And finally, the installation performed by your men was outstanding. They were detailed with setting everything up and patient with us as we asked them to move the pews a few different times. We were able to widen the space between the pews to allow for more comfort for our guests. That was a bonus that we hadn't even anticipated in this process. Your men seemed intent on helping us get the most out of our worship space.

I wish we had more pews to restore because we love the way our chapel looks and we thoroughly enjoyed working with you. Thanks for making the process so easy and rewarding.

Sincerely

Jesse Krohmer
Pastor of Development
